# Main Objectives

- Jumpstart growth cycle for tokens in circulation, increasing market-cap = increasing token value
- Use case catalysts to drive demand
- Blockchain network growth
- VPN network growth

# NVIS Ecosystem

# NVIS use cases to drive demand

- TSN user-to-user private messaging or data exchanges
- Community private data sharing
- Community secure data sharing
- Invisible, untraceable transactions
- 3<sup>rd</sup> party service provider
- TSN domain name registry
- DIY web hosting and streaming

# TSN Private blockchain growth factors

- NVIS rewards for solo mining (geth+VPN to use TSN blockchain)
- NVIS Full wallet (VPN+Mist variant) on Windows, Linux
- NVIS Light wallet on smartphone (requires VPN port)
- Invisible Private blockchain users extending TSN

# TSN VPN node growth factors

- Most consumers won't need blockchain
  - Private content consumers via TSN VPN
    - Depends on private content providers (streaming video/audio, messaging, web/auction sites).
  - Traditional VPN for remote DHCP to the Internet
    - Censorship avoidance (distant Internet access)
    - Remote access to a business or institution

# Growth Trajectories

- Pre-ICO
  - Over 2.5M tokens in circulation, investors
  - Over 10 blockchain nodes
  - Over 1000 VPN node capacity
- ICO
  - Over 10M tokens in circulation, exchanges
  - Over 100 blockchain nodes
  - Over 10,000 VPN node capacity
  - Over 100 miners
